

# Freescale MQX FTM Quaddec Driver Example Guide

## FTM Quaddec Driver example

This document explains the FTM Quaddec example, what to expect from the example and a brief introduction to the API.

### Note

This Example is available on AutoEVB Vybrid A5 BSP only in MQX 4.1.0 release.

### The example

The FTM Quaddec example code is used to demonstrate how to use the FTM Quaddec driver in applications.

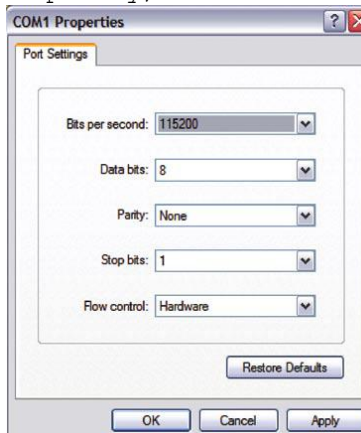

### Running the example

Start HyperTerminal on the PC (Start menu->Programs->Accessories->Communications).

Make a connection to the serial port that is connected to the board (usually will be COM1).

Set it for 115200 baud, no parity, 8 bits and click OK.

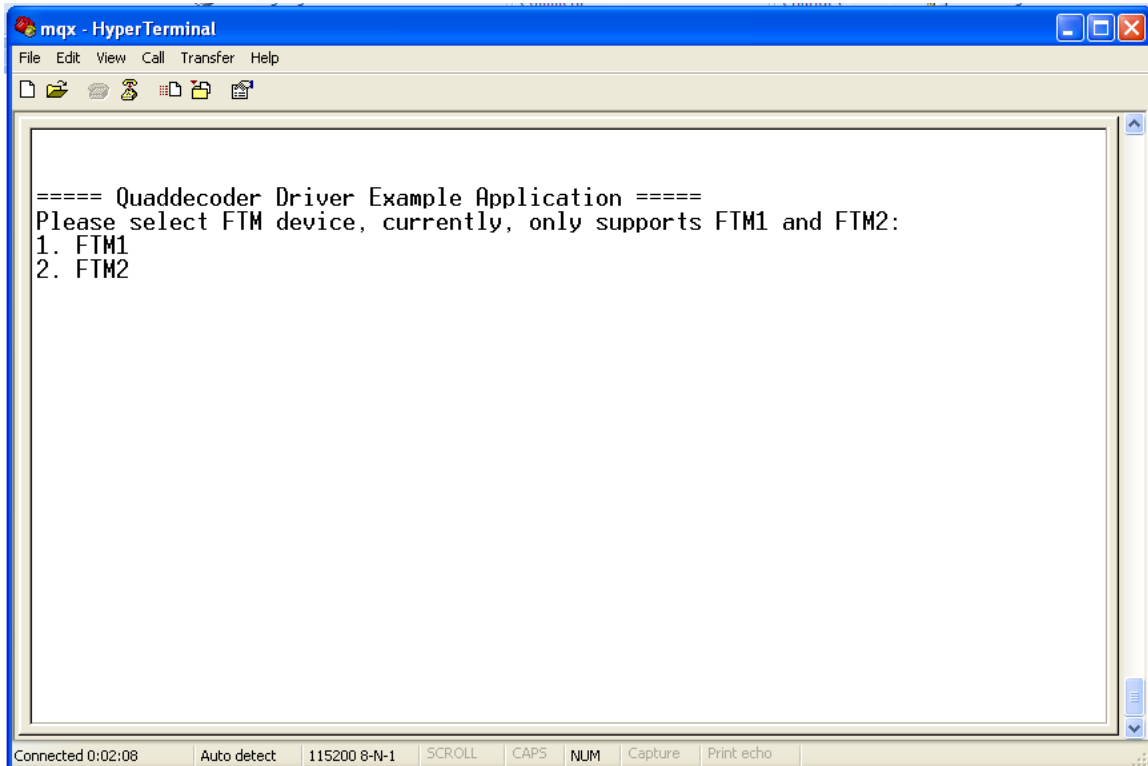

Then we compile the project FTM.

After successful build, user can download created image to the target board.

The sample code of the FTM Quaddec driver provides a simple UI:

The user should select FTM device between FTM1 and FTM2:

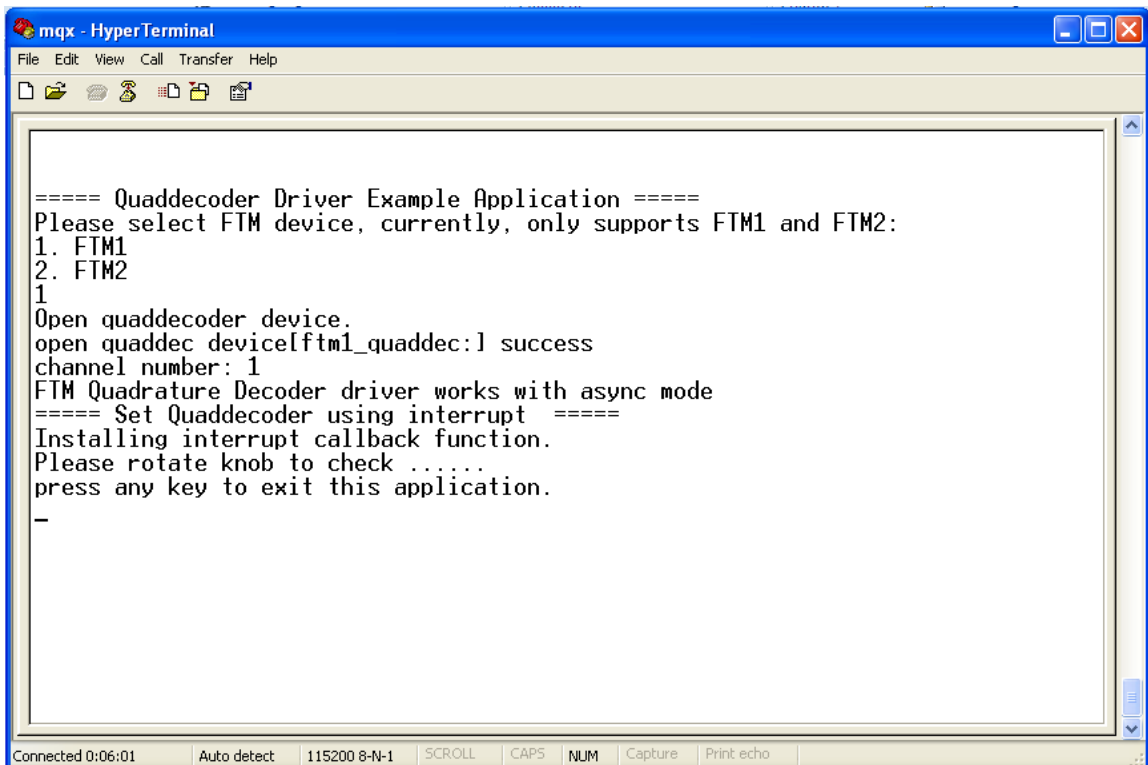

```
mqx - HyperTerminal
File Edit View Call Transfer Help

===== Quaddecoder Driver Example Application =====
Please select FTM device, currently, only supports FTM1 and FTM2:
1. FTM1
2. FTM2

Connected 0:02:08  Auto detect  115200 8-N-1  SCROLL  CAPS  NUM  Capture  Print echo
```

See the FTM example log:

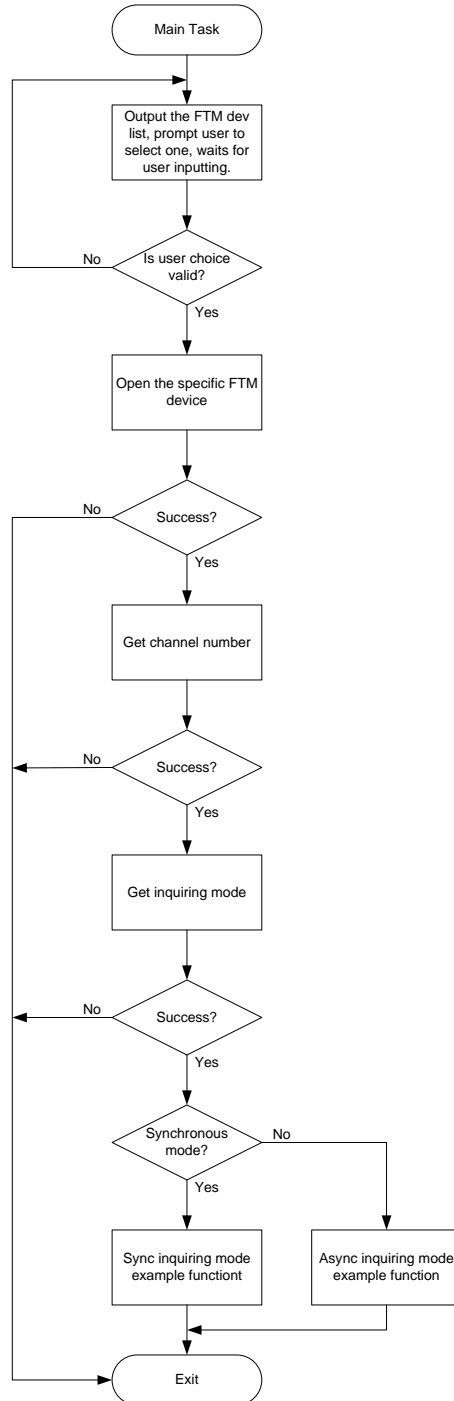

```
mqx - HyperTerminal
File Edit View Call Transfer Help

===== Quaddecoder Driver Example Application =====
Please select FTM device, currently, only supports FTM1 and FTM2:
1. FTM1
2. FTM2
1
Open quaddecoder device.
open quaddec device[ftm1_quaddec:] success
channel number: 1
FTM Quadrature Decoder driver works with async mode
===== Set Quaddecoder using interrupt =====
Installing interrupt callback function.
Please rotate knob to check .....
press any key to exit this application.
-

Connected 0:06:01  Auto detect  115200 8-N-1  SCROLL  CAPS  NUM  Capture  Print echo
```
